## SUMMARY

Creative React Developer with 2 & half + years of good knowledge in FE and BE areas using the MERN stack.

Passionate about Front End development, responsive design, animations, UX/UI, automated testing, performance, & accessibility. However, I can easily work on a full-stack basis, and create a full-fledged app from scratch (Frontend, Backend, DB, DevOps)

My ambition is to deliver production-grade applications, with professionalism, scalability, and performance in mind.

## EXPERIENCE

### Intermediate Software Engineer

#### Washmen

07/2022 - Ongoing Dubai, United Arab Emirates

A digital laundry and dry cleaning service in the UAE that picks up and delivers to your location - Rated Best Laundry in the UAE, and 3rd best in the World ~ CINET

- Feature lead heading the project planning, delivery, and onboarding for a project that need to support a new service line
- Implemented process for reusable components in development, which lead to a faster implementation rate of + 50%

## PROJECTS

### Shoe Sorting Station

The starting point of the items' journey. Responsible for assigning the customer their items. This is done by inserting item details. The feature also includes a resolution center to ease communication between the staff.

### Stain Man Station

Quality Assurance for item issues, to manage customer expectation if the stains found on the garments are removed or not.

### Pending Items Station

Acts as a communication tool between our facility and customers, by managing expectation and informing our customers of any delays in advance.

### Customer Portal

Status update sent to the customer to notify them on their items status.
